

trim loss

It is the panel removed.

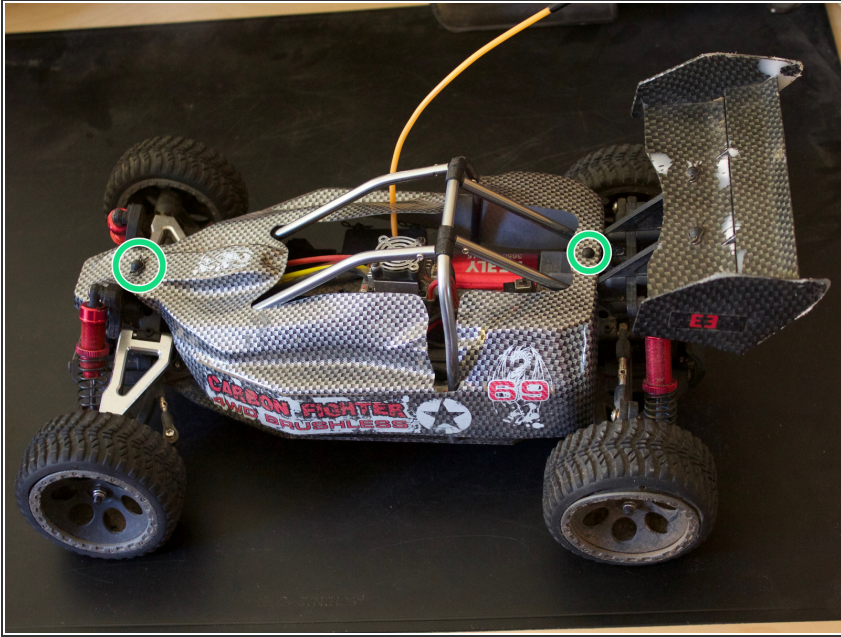

Written By: Leonard Kesting

INTRODUCTION

It is briefly shown how to remove the paneling and a small tip's even top.

Step 1 — trim loss

- These two cotter pins must be removed.

Step 2

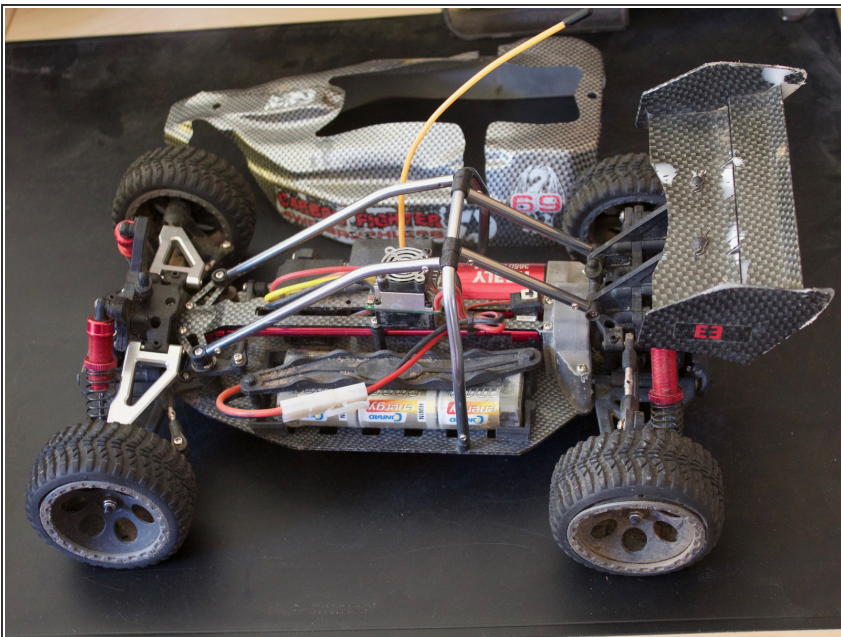

- Here, a screwdriver or other stable thin object (in the picture: letter opener) can be helpful

Step 3

- i** TIP: when the cladding frequently removed (eg for thorough cleaning) it may be useful to split pins with some electrical tape from ahead, so the use of aids is unnecessary

Step 4

- The panel is now disassembled

Arbeite die Schritte in umgekehrter Reihenfolge ab, um dein Gerät wieder zusammenzubauen.
